README

- 4.7.04056 is the current general use client for Windows, Linux, MacOS.

- 4.8.00175 is MacOS only and for Catalina compatibility.

- These are straight from Cisco. There won't be any preconfiguration of things like the VPN's address.
  - It is a good practice to install DART (diag tool) alongside the client for future troubleshooting. Should be one of the options or files.
